Choctaw Nation Layout & Presentation Job Aide

Purpose: Functional design reference for creating culturally respectful PowerPoint templates, handouts, and visual assets.

1. Color Management & Access

Apply these exact color specifications to establish clear, on-brand visual weight throughout your slide deck layouts:

Color Role	Hex Code	RGB Formula	PowerPoint / Layout Application
Flag Purple	#3E0286	62, 2, 134	**Hero background color** for title and conclusion slides. High impact.
Sky Blue	#76BEE4	118, 190, 228	**Primary accent color**. Perfect for infographics, chart data lines, and links.
Crimson Red	#C81F06	200, 31, 6	**Call-to-action color**. Use sparingly for warnings, metrics, or focal elements.
Lakna (Gold)	#FDD802	253, 216, 2	**Decorative border accents**. Enhances geometric framework components.
Canvas White	#FFFFFF	255, 255, 255	**Content slide background**. Maximizes text readability and clean white space.

2. Slide Architecture & Typographic Hierarchy

• **Title & Divider Slides:** Use solid *Flag Purple (#3E0286)* backgrounds paired with high-contrast White typography. Set headers to bold geometric sans-serifs (e.g., Montserrat or Arial Black) at 36pt–40pt.

• **Content Slides:** Keep backgrounds pure white or ultra-light gray. Use dark gray charcoal text (#222222) instead of pitch black to reduce eye strain over long presentations.

• **Hierarchy Scale:** Standardize slide titles at 24pt bold, section headers at 16pt bold, and normal body list text at 12pt–14pt regular copy.

3. Respectful Cultural Patterns & Visual Frameworks

• **Southeastern Geometric Motifs:** Incorporate traditional Choctaw geometry into your slide borders or slide layout accents. Use a *Full Diamond* pattern along borders to reflect protection and natural balance, or a *Half-Diamond* to signify progressive journeys.

• **Traditional Rope Braid:** Utilize a stylized rope braid border rule underneath major section slide headers. This reflects the traditional border framing used in official tribal community assets.

• **Avoiding Pitfalls:** Do not mix traditional Southeastern Woodland diamond motifs with unrelated plains tribal symbols (such as tipis or feathered headdresses). Maintain accuracy to the specific Choctaw heritage.

4. Legal Compliance & Trademark Safeguards

• **The Great Seal Restrictions:** Do not use the Great Seal of the Choctaw Nation as a decorative background watermark or generic placeholder icon on random presentation slides.

- **Commercial Permission:** Any public presentation deck, commercial design, or outward-facing brand material requires prior written layout review and approval from the *Choctaw Nation Division of Marketing and Communications*.
- **Motto Usage:** Treat the phrase *'Together We're More'* as a protected trademark asset. It should ideally sit cleanly on concluding summary slides alongside official tribal links.

This document is an independent graphic design workflow guide intended for framework planning and general layout reference. It does not replace live official brand guidelines managed directly by the tribal administration.
